

Ellen: All right I'm sitting here with five-year-old solar system expert Marshall Kimber. I know also about all the things in the universe. Ellen: You know all things in the universe. I would love to know more things. I know black holes. Ellen: Tell me about the black holes. It has gravity but it's not really a hole. Ellen: right. Because a thing that is smaller than humans, when they close they get tiny. Ellen: All right. Ellen: That's over my head. I don't even understand what you are saying. You're smarter than me. I like to help people learn more about what they like learning about so we're going to send you the California science center tomorrow. You're going to learn more about the solar system. Do you know about that place? Yeah. Ellen: That was one of the gifts. I think when you're there you're going to think it's a wonderful gift. We're going to give you some books, d.v.d.'s and toys to learn more about the solar system and i think you will like those things. Look at that. Ellen: These are gifts, right? Ellen: OK. But i think you will have fun at the place tomorrow as well but these are really good gifts and there is a little outfit you can wear too. mars, Jupiter, Saturn, Neptune. Ellen: That's right. Very good. I want to thank our guests. I will see you tomorrow. Be kind to one another. Bye.
